Washing machine : Yes	Heater : Yes
TV antenna : No	Dishwasher : Yes
SAT-TV : Yes	TV : Yes

Various

XBOAT ref: 6312.
This Falcon 86 is probably the most accomplished model of the brand. It offers incredible comfort at sea and a feeling of reliability and optimal safety. It is arranged in 4 double cabins: 1 very nice master cabin with its private bathroom, a guest cabin with very similar proportions to the owner's cabin with its bathroom, and two beautiful guest cabins, each with its own bathroom. At the front of the boat, accessible from the outside, there are two double cabins dedicated to the crew, each with its own bathroom.
The salon is divided into two spaces: one reserved for a large sofa and the other for the convivial table for lunches and dinners. The helm occupies a nice space that groups all the controls and control panels. On this boat, and it is probably the only one equipped in this way, you will discover a very ingenious control system for absolutely all the onboard systems: control of the lights, cameras, alarms, the triggering device for the bilge pumps, the battery bank in its entirety (services, engines, and generators), triggering of the air conditioning and generators, all these systems and equipment are operable and controllable from a smartphone. It is a perfect success of the integration of electrical and electronic systems for home automation and navigation into a single programmable and remotely manageable application.
The yacht's propulsion is provided by two fantastic MTU engines of 1,800 HP each, perfectly maintained. A powerful converter allows the use of most onboard equipment without using the generators during a relaxing anchorage.
This yacht is the perfect integration of the equipment and arrangements that an owner can expect from a 26 m yacht, regardless of the use: coastal or offshore navigation, anchoring, or staying in port.
This Falcon 86 is a magnificent choice for using a yacht for family private use and/or for charter where it is highly sought after for its 4 cabins.
