Various

Remarks :
This particular example was sold by us new to the current customer in May 2024. They are only selling due to upgrading to the next model in the range. She is particularly well spec'd having been fitted with the Yamaha 300hp engine, Garmin 9inch plotter, Icom VHF, upgraded Fusion stereo system with signature speakers, Webasto diesel heating, leaning post with sink and hob, fridge, front sundeck cushions, electric windlass, double berth complement in saloon, marine toilet with holding tank, bow thruster, LED lights in cockpit, fully bespoke Bimini and full cockpit enclosure, Evo decking synthetic teak on swim platforms, cockpit floor, walkways and table and many more.

The Jeanneau Cap Camarat 7.5 WA Series 3 is a great alternative to a RIB of similar length because she is more spacious, has a higher freeboard keeping you dry, provides flexible and social space around a table and gives you modest overnight accommodation to make cruising a real possibility. This is an extremely versatile boat that is family friendly with its high guard rails and walk around decks making it safe for all aboard. This model also benefits from having lifting sun beds on the bow, electric windlass, marine toilet complete with holding tank and a cabin for overnighting or sheltering from the weather.

Please call us on 01243 550042 for more information and to arrange a viewing.

Accommodation :
Accommodation:

The interior space is accessed via the large sliding perspex, beveled hatch which allows light in even when closed. Down below there is a counter top on the Port side that houses a fresh water tap with stainless steel bowl and storage below.

On the starboard side there is a separate compartment that provides privacy for the heads compartment that accommodates the marine toilet which is coupled with a holding tank. This particular example also comes with the berth conversion kits that gives a hard backed cushion insert to make the V berth to provide a good sized sleeping area.

This space is well ventilated as you have the opening forward facing porthole, this combined with the large sea vision style portholes make it a light and ventilated space.
