## Various

Sloop 580 now in the online auction. everyone can bid until 16 March 2026.

### Classic Steel Sloop 580 with Teak Deck and Vetus Diesel Engine

This stylish steel sloop of the 580 type combines a classic appearance with practical sailing characteristics, ideal for leisurely trips on inland waters, canals, and lakes. With a length of 5.80 meters and a width of 2.15 meters, this sloop offers ample space for company, while its compact size ensures agility and easy maneuverability, even in narrow waterways.

### Sloop 580 now in the online auction. Everyone can bid until March 16, 2026.

### Timeless Design with High-Quality Finish

The sloop is built with a steel hull, contributing to its robust appearance and solid sailing characteristics. The classic lines are enhanced by the real teak deck, which is not only visually appealing but also provides a warm and natural look on board. The interior is finished with lacquered wooden elements, giving the whole a well-cared-for and authentic atmosphere. The sprayhood offers protection against sun and wind, while the deck cover provides protection when the boat is not in use.

The seating area is surrounded by comfortable cushions, and with the supplied wooden floor and extra cushions, it is easy to create a generous sunbed. This makes the sloop extremely suitable for relaxing days on the water, where comfort and style go hand in hand.

### Propulsion and Performance

The sloop is equipped with a Vetus inboard diesel engine with a power of 13 hp. This two-cylinder engine is electrically started and has approximately 755 operating hours. The engine is equipped with a temperature gauge and tachometer, contributing to straightforward operation. Thanks to the diesel engine, the sloop is suitable for longer trips, resulting in a calm and stable ride. The draft of 60 cm allows for navigation in shallower waters, making the sloop versatile.

### Technical Equipment and Safety

On board, there is a 12v electrical system, including a battery charger and voltmeter. The battery was renewed in 2025, contributing to the reliable operation of the electrical systems. The electric bilge pump provides extra safety while sailing. For mooring, the sloop is equipped with fenders and lines, and an anchor with a line is available for temporary mooring on open water.

The hull was fully painted in 2018, and in 2025, the underside was treated again with antifouling, and new anodes were installed. These maintenance activities contribute to the durability of the underwater hull.

### Sailing Experience and Usage Possibilities

This sloop has been used for recreational sailing in the canals of Amsterdam and on lakes and ditches for years. The owner has had the boat since 2014 and has had annual maintenance performed, including taking it out of the water for inspection and cleaning. The sailing characteristics are characterized by stability, tranquility, and smooth steering, making the sloop suitable for both novice and experienced water sports enthusiasts.

Thanks to its classic design and practical layout, this sloop is ideal for day trips with family or friends. Whether it's a relaxing afternoon on the water or a summer evening trip through the city canals, this sloop offers comfort, style, and a pleasant sailing experience.

### Summary

This steel sloop 580 is a characterful boat with a classic appearance, a teak deck, and a reliable Vetus diesel engine. The combination of a timeless design, comfortable equipment, and practical sailing characteristics makes this vessel an attractive choice for lovers of leisurely sailing on inland waters. With its well-cared-for finish and thoughtful layout, this sloop is ready for many new sailing seasons.
