## Various

<p>XBOAT ref :6233.  
SUPERAMERICA RIVA 50 from 1985.

The Riva Superamerica was the flagship of Riva's fiberglass production for about 20 years, known and admired worldwide, it was built in 251 units from 1972 to 1992. It was the first flying bridge entirely built by the Riva shipyard and designed by architect Giorgio Barilani, who designed the futuristic and bright cylindrical atrium, located under the windshield, which leads from the dinette to the two cabins. A project that recalls the artistic perfection of Giotto. The Superamerica 50 HP is the last version of this unmatched fly model, the conceptual design and essence of Riva applied to this magnificent model.

Superb, recent refit, electric controls, integrated aft platform in the structure, quality of construction of the Riva shipyard from the 1985 years.
