now in the online auction. everyone can bid until 6 July 2026.

Fibrafort 255 Bowrider for sporty boating fun
This 2022 Fibrafort 255 is a striking bowrider that invites long summer days on the water. The boat originates from Brazil and was developed with support from Porsche Consulting; reflected in her sleek lines, well-thought-out layout, and sporty appearance. With a length of 7.25 metres and a beam of 2.57 metres, the Fibrafort 255 offers plenty of space on board, while still being an attractive size for those looking for a fast day boat that remains practical to handle. Her stepped V-hull is made of polyester and is designed to plane quickly and run comfortably through the water, both on lakes and inland waterways.

Fibrafort 255 now in the online auction. Anyone can bid up to and including 6 July 2026.
This lot concerns a demo boat with few engine hours. She has been used on inland waterways, canals and ditches, and on lakes; mainly for day trips, sporty use and holidays. This makes her an attractive choice for anyone looking for a modern bowrider, sports boat or luxury day boat with a fresh look and a powerful drivetrain.
What makes this Fibrafort 255 so special?
The Fibrafort 255 combines sporty performance with comfort features you would normally expect in a larger class. She is equipped with a Mercury 6.2 V8 inboard engine with 350 hp and DTS controls, paired with electric start. With approximately 40 engine hours, the engine has only been used to a limited extent. The stated cruising speed is around 45 km/h and the top speed around 80 km/h, making this sports boat suitable for both relaxed trips and dynamic boating.
On board you will find practical gauges such as a tachometer, temperature gauge, oil pressure gauge and fuel gauge. The petrol tank has a capacity of 200 litres, which is convenient for longer days on the water without having to refuel constantly. For fresh water, there is a 28-litre water tank.
How is she equipped for comfort on board?
Comfort has clearly been taken into account in the design. The boat features an electric toilet, with the discharge not leading directly into open water. Next to the toilet there is also a washbasin with shower, complemented by a mirror, making time on board just that bit more pleasant during longer days on the water.
Externally, she is equipped with a bimini and sprayhood for shelter, plus covers to protect her. The teak deck gives her a warm, luxurious look and also provides pleasant grip underfoot. A cockpit table is available for food and drinks on board, and the swim ladder makes it easy to get back on board after a dip. Fenders and lines are included, so you can moor her straight away.
Is this bowrider suitable for sporty boating?
Yes, this Fibrafort 255 is clearly built with sporty boating in mind. Her stepped V-hull helps with efficient planing and contributes to stability at higher speeds. Combined with the Mercury 350 hp V8, this is a fast sports boat that continues to perform briskly even with multiple passengers. The wheel steering is positioned outside, which suits the open character of a bowrider and provides direct contact with the water and your surroundings.
What about power supply and safety?
On board there is a 12V system with two batteries and a total capacity of 120. She has shore power, a battery charger, alternator and voltmeter, which makes use in the marina or at the dock practical. For safety and visibility there is LED navigation lighting and interior lighting. A fire extinguisher is also present, including a remotely activated fire-extinguishing solution as listed in the equipment. In addition, an electric bilge pump has been installed.
For anchoring there is an anchor with chain and an electric anchor winch, complemented by a stainless-steel anchor roller. This makes it easy to stop for a while in a bay or on a quiet part of a lake.
Does she suit my cruising area and plans?
She feels at home on lakes and inland waterways and has also been used on canals and ditches. With a draft of approximately 70 centimetres you can reach many places, while her size and layout

make her suitable as a day boat for families, as a sporty tender-style boat for recreation, or as a comfortable bowrider for holiday days. Anyone looking for a Fibrafort 255 for sale via a boat auction will find in this lot a modern, powerful and eye-catching presence with a complete basic specification and a distinctive design.

This boat is auctioned via Boatauction. Check the lot information for the latest details and get ready to experience her on the water yourself soon.
