Four Winns 170 Freedom now in the online auction. everyone can bid until 18 May 2026.

en

Four Winns 170 Freedom is a sporty and compact speedboat with potential. The 1990 Four Winns 170 Freedom is a sporty, agile speedboat measuring 5.10 metres in length and 2.25 metres in beam. This compact runabout was built by the renowned American yard Four Winns, known for their solid GRP boats with well-thought-out hull construction and a comfortable layout. The 170 Freedom is designed for recreational use on inland waters and sheltered coastal areas, offering space for relaxed day trips, watersports activities, or simply enjoying time on the water.

Four Winns 170 Freedom now in the online auction. Anyone can bid up to and including 18 May 2026.

Design and hull construction

The hull of the Four Winns 170 Freedom is made of GRP (polyester) and features a classic V-bottom. This hull shape provides stable handling and a smooth ride, even at higher speeds or in light chop. The boat is equipped with wheel steering, making manoeuvring simple and direct. Thanks to its compact dimensions, this speedboat is easy to trailer and store, making it attractive for those looking for flexibility and mobility.

Engine and performance

The boat is fitted with an OMC inboard engine producing 130 hp. This four-cylinder engine is electrically started. The engine is currently removed/loose and has not been tested, leaving room for overhaul or replacement to suit your preferences. For handy DIYers or technical project enthusiasts, this can be an interesting opportunity to optimise the boat to their own requirements. The engine's power combined with the boat's light weight makes the model suitable for sporty performance on the water, such as waterskiing or wakeboarding, provided the engine is brought into working condition.

Interior and comfort

The seat upholstery is in neat condition and offers seating for several passengers. The layout is functional and focused on comfort while underway. The open cockpit provides ample freedom of movement and is ideal for day trips with family or friends. The finish is typical of the build period, with a classic look that will appeal to lovers of timeless designs.

Options and use

The Four Winns 170 Freedom is ideally suited for recreational use on lakes, rivers and other inland waterways. Thanks to its compact size, the boat is easy to handle, even for less experienced skippers. It offers possibilities for day trips, watersports, or simply relaxed cruising. For those looking for a project boat with potential, this model provides a solid base for further personalisation or upgrades.

Documentation and registration

The boat has an RDW registration number YS-00-52. The registration certificate is present, which simplifies transfer and administration.

Conclusion

The 1990 Four Winns 170 Freedom is a compact, sporty speedboat with a classic appearance and functional design. With its GRP hull, V-bottom and powerful inboard engine, it offers a solid foundation for recreational use. Although the engine status is unknown, this makes the boat interesting for buyers looking for a project or a vessel that can be adapted to their own wishes. This speedboat combines style, space and performance in a manageable size, making it an attractive choice for anyone wanting to get out on the water with a characterful and versatile boat.
