**<p>Wato 700 now in the online auction. everyone can bid until 16 March 2026.**

**<h2>Wato 700 Sloop with Vetus Diesel Engine &acirc;#128;&#147; Spacious and Stylish Polyester Sloop from 2021</h2><p>**The Wato 700 is a contemporary and spacious sloop that combines comfort, style, and functional sailing characteristics in a modern design. This 2021 model has been used only once and has since been stored ashore, which benefits the overall condition of the vessel. With a length of 7 meters and a width of 2.5 meters, this sloop offers surprisingly ample space on board, ideal for relaxing day trips with family or friends on inland waters or lakes.</p><h3><strong>Wato 700 now in the online auction. Everyone can bid until March 16, 2026.</strong></h3><h3>Comfort and Space on Board</h3><p>

The Wato 700 is designed with comfort and ease of use in mind. The spacious cockpit is equipped with high-quality cushions, crafted by the renowned Victorie sailmaker. These comfortable seating and lounging areas allow you to fully enjoy sunny days on the water. The sprayhood provides shelter from wind and sun, making longer trips pleasant as well. Thanks to the relatively high hull, splashing water is effectively kept at bay, contributing to a dry and safe sailing experience.</p><p>

The layout of the sloop is practical and well-thought-out. There is already a preparation in place for the installation of a tap or sink, which increases the possibilities for further customization. The rope fender from Langman gives the boat a classic appearance while also providing extra protection when docking.</p><h3>Engine and Sailing Characteristics</h3><p>

This Wato 700 is equipped with a Vetus M3.29 diesel engine from 2023, with a power of 27 hp and three cylinders. The engine is electrically started and has only 1 running hour, meaning it has hardly been used. Thanks to the intercooling technology, the engine remains efficient and cool, even on longer trips. The propulsion is via a stainless steel propeller shaft of 25 mm and a ship's propeller of the type P3B (14" x 9" RH), ensuring smooth and quiet propulsion.</p><p>

The hydraulically operated tiller with a stainless steel rudder blade of 400 mm contributes to precise and light steering. The boat is steered via a steering wheel in the open cockpit, providing a direct and intuitive sailing experience. The combination of engine, propeller, and rudder makes this sloop particularly maneuverable and suitable for both narrow canals and open water.</p><h3>Construction and Material Use</h3><p>

The hull of the Wato 700 is made of durable polyester, a material known for its strength and low-maintenance properties. The boat has a draft of 80 cm, making it suitable for shallower waters. The construction is robust and stable, contributing to a comfortable and safe sail, even in changing weather conditions.</p><h3>Stylish Appearance and Practical Details</h3><p>

The Wato 700 combines a modern look with classic details. The rope fender, the shape of the hull, and the interior finish give the sloop a timeless character. The sprayhood and cushions are custom-made and seamlessly match the design of the boat. The 12V electrical installation with one battery provides for the basic needs on board, such as lighting and starting the engine.</p><h3>Berth and Viewing</h3><p>

This Wato 700 is ready to hit the water and offers an excellent opportunity for those looking for a spacious, stylish, and immediately deployable boat with a modern diesel engine.</p><p>

Whether you are looking for a comfortable sloop for day trips, a stylish boat for relaxing cruises, or a solid base for further equipment, this Wato 700 offers an attractive combination of space, performance, and appearance.</p></p>
