Nimarine 360 now in the online auction. everyone can bid until 20 April 2026.

Nimarine 360 RIB (2019) – compact and sporty RIB with Mercury 20 hp for lakes and day trips

The 2019 Nimarine 360 is a nimble RIB that is ideal for anyone looking for a compact, practical and sporty inflatable boat with a rigid GRP (polyester) hull. With a length of 3.60 metres and a beam of 1.80 metres, this model feels surprisingly spacious on board, while its size makes docking, manoeuvring and boating on busy recreational waters easy. Thanks to the V-hull, this RIB runs stable and tracks well, even when the water gets a bit choppier. This makes the Nimarine 360 an interesting option for day trips, leisure cruising and sporty use on lakes and similar inland waters.

The boat is built in polyester and has a draught of approximately 50 cm. The clearance height of about 1.00 metre makes it possible to navigate many routes with bridges and low obstacles, depending on local conditions.

The cockpit is self-draining, which contributes to ease of use and safety both underway and at rest.

Nimarine 360 now in the online auction. Anyone can bid up to and including 20 April 2026.

Hull, handling and boating experience

A key feature of a RIB is the combination of a rigid hull with buoyant tubes, creating a stable platform on the water. The Nimarine 360 sits calmly in the water and feels immediately familiar, even for less experienced skippers. The V-hull helps cut through small waves and contributes to a comfortable ride. In practice, this means you can cruise in a relaxed way with this RIB, or quickly move to a swimming spot or jetty.

Steering is via a wheel with an external helm position, which suits the open character of this type of boat. The single rudder and the direct response of an outboard engine provide a lively steering feel

– ideal for those looking for a boat that reacts lightly and predictably.

Mercury 20 hp outboard – performance and efficiency

Mounted on the transom is a 2019 Mercury outboard engine with 20 hp, electric start and two cylinders. With approximately 800 running hours, the engine has been used as you would expect for recreational boating. The stated cruising speed is around 9 km/h and the top speed around 35 km/h, making this Nimarine 360 suitable for both relaxed cruising and a more sporty ride. The petrol tank has a capacity of 12 litres and a fuel gauge is fitted, so you can keep an eye on consumption and remaining fuel while underway.

According to the owner, the boat went into winter storage every year and the engine received periodic servicing. In 2024 the boat was last taken out of the water and antifouling was applied, which is convenient for anyone who wants to keep the boat in the water during the season.

On-board equipment and practical details

This Nimarine 360 RIB is equipped with a compass for basic navigation and a 12V system with alternator and voltmeter. One battery is present, with sufficient capacity for the on-board functions. For anchoring, there is an anchor with line attachment, useful for a break on the water or for drifting peacefully.

Externally, the boat is fitted with exterior cushions for extra seating comfort, fenders and mooring lines, and a swim ladder that makes re-boarding easier after swimming or watersports. In addition, life jackets, a fire extinguisher, a flag on the transom and a boat horn are included in the sale, making the package immediately ready for recreational outings.

Who is this Nimarine 360 suitable for?

The Nimarine 360 is an attractive choice for buyers looking for a compact RIB with a pleasant mix of stability, speed and simplicity. Think day trips with friends or family, a cruise across the lake, anchoring in the sun, or quickly moving from place to place. Thanks to its manageable size, this type of RIB is also interesting for those who want a boat that is easy to handle at the jetty and in narrow marinas.

Are you looking for a Nimarine RIB with a Mercury 20 hp that can run sportily, drift comfortably and is practically equipped for recreational use? Then this 2019 Nimarine 360 is definitely worth a look.
