<p>Yam 380 now in the online auction. everyone can bid until 18 May 2026.

<h2>YAM 380 (2025) with Yamaha F6D and Damco road trailer â€“ compact PVC inflatable boat for carefree leisure boating</h2><p>The 2025 YAM 380 is a practical and versatile inflatable boat that is perfectly suited for recreational use on inland waters. With a length of approx. 3.60 metres and a beam of 1.70 metres, this model offers a pleasant balance of stability, space and easy handling. Thanks to its limited draft of around 30 cm, this boat is also suitable for shallower routes, calm lakes, canals and sheltered waters. For buyers looking for a compact motorboat that is easy to transport and launch, this YAM 380 is an attractive choice.</p><p>The boat is made of PVC, a material popular for inflatable boats due to its low weight and practical properties for recreational use. The package is intended as a user-friendly set: the boat is combined with a Yamaha outboard engine and a matching road trailer, allowing you to set off quickly and remain flexible in where you want to cruise.</p><h3>YAM 380 now in the online auction. Anyone can bid up to and including 18 May 2026.</h3><h3>Dimensions, handling and ease of use</h3><p>With its dimensions, the YAM 380 is an inflatable boat that is easy to handle, both on the water and ashore. The 1.70-metre beam contributes to a stable feel, which is pleasant when boarding, mooring or cruising calmly with passengers. The shallow draft makes it possible to cruise close to the shoreline or reach areas where a larger tender or console boat has more difficulty. This type of boat is well suited to leisure boating, short trips and relaxed exploration of inland waterways.</p><p>The steering is positioned externally and matches the character of a compact outboard-powered boat: direct, clear and accessible. Thanks to its size, manoeuvring through narrow passages or at a slipway is generally easy, making this set interesting for watersports enthusiasts who like to head out independently.</p><h3>Yamaha F6D outboard engine: 6 hp and lively performance</h3><p>The YAM 380 is powered by a Yamaha F6D outboard engine with 6 hp, manual start and petrol fuel. This output suits the size of the boat well and offers a pleasant mix of relaxed cruising and brisk travel. The stated top speed is around 20 km/h, which is more than sufficient on many inland waters to travel comfortably from A to B while enjoying the scenery.</p><p>A 6 hp outboard is also popular for its simple operation and straightforward use. Manual start means less complexity and a direct, mechanical operation that many boaters appreciate. The engine is in working order and, according to the information provided, the set has seen limited useâ€”around 15 engine hoursâ€”after which the boat was stored indoors.</p><h3>Trailer included: Damco single-axle road trailer (2025)</h3><p>The sale includes a 2025 Damco road trailer, a single-axle model measuring approx. 450 x 170 cm. The trailer is unbraked and non-tilting, and is equipped with a trailer winch. With three rollers, the trailer is set up to keep loading and unloading practical, especially in combination with the compact size of the YAM 380. For buyers who like to take their inflatable boat to different cruising areas, a boat with trailer is a major advantage: you are not dependent on a permanent berth and can easily switch between waters.</p><h3>Equipment and extras for immediate use</h3><p>The set comes with useful accessories that enhance ease of use, including life jackets, rubbing strakes and a wheel clamp. Documentation is also available in the form of an invoice.</p><h3>Who is this YAM 380 a smart choice for?</h3><p>This YAM 380 with Yamaha 6 hp outboard engine and Damco trailer is particularly interesting for watersports enthusiasts looking for a compact inflatable boat for leisure boating on inland waters. Think relaxed trips, an afternoon on the water with family or friends, or exploring quiet routes where a larger boat is less practical. The combination of PVC inflatable boat, outboard engine and road trailer creates a complete and flexible set that suits people who like to get on the water spontaneously and want to store and transport their boat easily.</p><p>Are you looking for a 3.60-metre YAM inflatable boat with Yamaha outboard engine, including

trailer, so you can start boating quickly? Then this YAM 380 (model year 2025) offers an attractive all-in-one solution with an accessible boating experience and practical equipment for recreational use.</p></p>
