## Various

Jata California Skiff JV1450 now in the online auction. everyone can bid until 18 May 2026.

**Jata California Skiff JV1450 auction lot**  
This 2017 Jata California Skiff JV1450 is a practical and spacious polyester skiff measuring 4.20 metres in length and 1.60 metres in width, built by Jata Boats in Tegelen. The boat is designed with a flat bottom and a shallow draft of around 20 centimetres, making it well suited to shallow inland waters. Think canals and ditches, but also lakes, ponds and calm stretches of river. In this Boatauction auction lot you get a no-nonsense boat with plenty of possibilities to fit her out to your own wishes, for example as a fishing boat, console boat or simple transport boat for recreational use.  
The California Skiff was originally purchased for electrofishing and, according to the seller, has only been used a few times per year. That fits the character of this type: an open skiff that excels in visibility, working space and simplicity. Thanks to her open layout and wide build, the boat offers plenty of freedom of movement on board, which is ideal for fishing, surveying, maintenance work or simply a relaxed day on the water.

**Jata California Skiff JV1450 now in the online auction. Anyone can bid up to and including 18 May 2026.**  
**What kind of boat is the Jata California Skiff JV1450?**  
The Jata California Skiff JV1450 is an open polyester boat with a flat bottom, intended for shallow water and practical use. She is self-draining and built to be unsinkable, which makes her attractive for buyers looking for a functional skiff with a reassuring design principle. Thanks to the simple base, the boat is also suitable for those who prefer to decide for themselves where seating, storage options or a possible console and accessories should be placed.  
**What was she used for and on which waters?**  
The boat was used for electrofishing and operated on inland waters, including canals and ditches, as well as lakes, ponds and rivers. Such use typically requires a boat that is easy to handle, quick to launch and offers sufficient space for work. At the same time, it is a type of boat that also lends itself well to recreational use, for example as a fishing boat for shallow spots or as a simple, sloop-like open boat for short trips. Her shallow draft makes it possible to reach places where deeper boats have to turn back.  
**What is included with this auction?**  
This Boatauction lot includes a trailer, year of manufacture 2018. It is a single-axle, unbraked tipping trailer with rollers. The tipping mechanism helps when launching and retrieving, especially on slipways where you want to let the boat slide in a controlled manner. In addition, two loose bench planks are included, useful for keeping the onboard layout flexible.  
**What documentation is available?**  
Documentation is available in the form of a proof of purchase and proof of insurance. In addition, the type plate is listed with number 613 nl-jat rm 023 d 817 and the build number is 0613. For many buyers this is convenient, as it helps with identification and recording details for personal administration or future insurance.  
**Are there any known points of attention?**  
One known point of attention has been mentioned: a missing drain plug. This is a small part, but something to resolve immediately after purchase so the self-draining system can be used correctly. No other defects have been reported. As always, anyone looking to buy a Jata California Skiff via a boat auction is advised to inspect the boat in person during a viewing day and determine what fit-out or modifications she needs for the intended use.  
All in all, this Jata Boats skiff is an inviting base for someone looking for a spacious, shallow-draft polyester boat with trailer, and who enjoys fitting her out to their own preferences as a fishing boat, console boat or practical open boat for Dutch inland waters.
