TV antenna : No	Dishwasher : No
SAT-TV : No	TV : No

Various

The Sunreef 55 ULTIMA represents a bold evolution in contemporary yachting, combining performance, efficiency, and refined design in one striking platform. Built with minimized energy consumption in mind, this luxury hybrid yacht blends speed and stability with intelligent eco-innovation, delivering a smooth and remarkably quiet cruising experience.

Design
Her design is centered around open living and seamless movement. A full walkaround deck enhances safety and flow, while the vast semi-open saloon connects effortlessly to expansive aft lounging areas. Twin fold-down bulwark platforms extend the beam at anchor, transforming the stern into a true waterside retreat. Custom sea-stairs ensure safe and easy access to the water, while smart, integrated storage solutions keep water toys organized and ready for use.

Ultralight Solar panels
Ultralight, thin, and flexible solar panels are discreetly integrated into the structure, supporting onboard systems and reducing generator reliance. The result is a yacht that feels both progressive and practical â€” ideal for owners seeking a forward-thinking, low-consumption platform without compromising on comfort or style.

The Sunreef 55 ULTIMA offers a rare balance of innovation and liability, equally suited for private cruising or high-end charter operations.

Hybrid engines
As the yachting world turns its focus toward cleaner, quieter, and more efficient cruising, hybrid yachts have emerged as a defining innovation. No longer a niche experiment, they now represent a serious shift in how luxury yachts are designed and operated.

Blending traditional combustion engines with advanced electric propulsion, hybrid yachts strike a balance between performance and environmental responsibility, offering a glimpse into the future of yachting without sacrificing the thrill of the open sea.
