## Various

Vlet 400 now in the online auction. everyone can bid until 22 June 2026.

**compact vlet 400 for relaxed cruising**  
this vlet 400 is a pleasant, compact polyester boat that invites you to head out on the water spontaneously. she is easy to oversee in size, light to handle, and therefore appealing to anyone looking for a practical, sloop-style vlet for short trips, a loop through the canals, or quiet cruising on lakes and waterways. via boatauction, this boat is being auctioned as an accessible entry-level option for water sports enthusiasts who mainly value simplicity and fun on the water.

the boat is 4.00 metres long and 1.40 metres wide, with a shallow draft of approximately 0.15 metres. this makes her suitable for shallower waters and places you rather not take a larger boat. thanks to the external steering position, you maintain a clear view all around while underway, which is convenient when docking, passing under bridges, or manoeuvring through narrower passages. the polyester hull is practical in use and suits a boat you want to use casually for recreation.

**what kind of boat is the vlet 400 exactly?**  
the vlet 400 is a compact vlet with a simple layout: an open boat that lets you get on the water without much fuss. she is intended for relaxed outings with a small group, or as a handy boat for short trips. due to her limited length and beam, the vlet is easy to steer and to berth alongside a jetty, and she feels at home in sheltered waters such as canals, city waterways, and smaller lakes.

anyone searching for terms like **buy a vlet**, **polyester vlet**, **small boat with outboard motor** or **compact sloop** will quickly come across this type. this vlet is especially interesting for buyers looking for an affordable boat to learn boating, or for those who want a small recreational boat for calm days on the water.

**which engine is fitted and how does she start?**  
mounted on the transom is a suzuki df4 outboard engine, a 4-stroke petrol engine with 4 hp. according to the information provided, the engine is operational and is started by hand. this type of outboard suits a light boat like this vlet 400 well: simple, straightforward, and ideal for leisurely cruising. the serial number is 00401f-682152, useful for your own records or future servicing.

**with 4 hp she is not intended as a fast boat, but rather as a combination for relaxed boating. think of quiet cruising through town, a trip along reed beds, or an afternoon drifting with a fishing rod or a picnic on board.**

**what condition is the boat in and what is known about maintenance?**  
the boat's condition is described as reasonable. in 2026 she was last taken out of the water for maintenance. no information has been provided about a recent antifouling treatment. there are no indications of osmosis or reported traces of osmosis, which is an important point for many buyers of a polyester boat.

**because this is an auction boat, it's worth taking the time to inspect her during a viewing and form your own impression of the hull, finish, and overall appearance. this will help you better assess what attention she may require in the short or medium term, in line with your plans and cruising area.**

**is she suitable for beginners and for narrow waterways?**  
yes; her compact dimensions make this vlet 400 attractive for beginner boaters. she is easy to oversee, responds directly to steering and throttle, and thanks to the shallow draft you can reach many places where larger boats are less comfortable. for anyone looking for a small boat for canals and waterways, this size is often practical, especially if you regularly need to dock or turn around in limited space.

**if you're looking to buy a small boat or a boat with outboard motor that you can use without complicated systems, this vlet is a good match.**

**what is and isn't included?**  
no trailer is included in this

auction, and there is no tender included. that means it's worth thinking in advance about transport, storage, and launching. if you already have a berth alongside a jetty or can keep her on a boat lift or in a marina, that is often quickly arranged. for road transport you will need to organise a suitable solution yourself.

this vlet 400 with suzuki outboard engine is therefore a no-nonsense choice for anyone looking for a compact polyester boat mainly to log plenty of hours on the water. she is waiting for a new owner who will take her out regularly again and enjoy the simple pleasure of boating.
