## Various

A hellas 500 now in the online auction. everyone can bid until 22 June 2026.

**An A Hellas 500 ready for boating fun**  
Offered via Boatauction is this A Hellas 500: a practical polyester motorboat of approximately 5.00 metres in length and 2.00 metres in beam, with a shallow draft of about 0.25 metres. This makes her at home on a wide range of waterways, from canals and ditches to lakes, ponds and rivers. The boat has been used for day trips, leisure cruising and a sporty outing, and that character suits her well: compact, easy to oversee, and inviting for spontaneous time on the water.

The Hellas 500 features outboard steering via a steering wheel. This gives a familiar feel on board and makes manoeuvring on inland waters pleasant and direct. Thanks to her dimensions, she is also easy to handle at moorings and in narrower passages. According to the information provided, the polyester hull is free of osmosis or traces of it; an important point for many buyers when considering a GRP boat.

**What kind of boat is the A Hellas 500?**  
The A Hellas 500 is an open motorboat suited to relaxed trips with family or friends. She offers an accessible layout with seating and an outside helm position, so while underway you stay truly connected to the water and your surroundings. With a beam of 2.00 metres, the boat sits stably on the water, while the limited draft makes her suitable for shallower stretches and calm cruising routes. Anyone searching for a 5 metre polyester motorboat, an open motorboat with steering wheel or a boat for inland waters will quickly come across this type: practical, versatile and focused on enjoyment.

**Which engine is fitted and what can you expect?**  
She is equipped with a Johnson outboard engine, model J15TEL4ST, with an output of 15 hp and year of manufacture 2003. According to the information provided, the engine is operational. A 15 hp outboard is a great match for many inland waterways: enough power for a brisk cruise, while remaining straightforward in use and operation. For those searching for a Johnson 15 hp outboard, a petrol outboard or a motorboat with Johnson engine, this is a recognisable and sought-after set-up. The petrol propulsion makes her suitable for flexible day trips, allowing you to plan easily around refuelling and cruising time.

**Is she suitable for canals, lakes and rivers?**  
Yes; this Hellas 500 has been used specifically on those types of waters: inland waterways, canals and ditches, lakes, ponds and rivers. Her shallow draft helps on shallower sections and when approaching banks or jetties. At the same time, her size results in a boat that is not intimidating to handle, even if you moor frequently or pass under bridges and through narrow passages. Anyone looking for a boat for canals or a motorboat for lakes and rivers will often find this size offers a pleasant balance between space and manoeuvrability.

**When was she last taken out of the water?**  
According to the information provided, the boat was last taken out of the water for maintenance in 2026. This is relevant for buyers who pay attention to the overall condition of a used motorboat, such as the state of the underwater hull and typical points of attention for a polyester hull. An antifouling treatment is not specified, which may mean it was not recorded or was not applicable to the way the boat was used. If desired, you can pay extra attention to this during an inspection.

**Is a trailer included?**  
Yes, she comes as a complete set with a storage trailer. It is a JovOr skid trailer, unbraked, single-axle and non-tilting. The condition of the trailer is described as reasonable. A storage trailer is especially useful for storage and moving the boat on private property or at a yard, and it makes logistics easier if you want to keep her out of the water during winter or between outings. For those searching for a boat with trailer or a motorboat including storage

trailer&acirc;&#128;&#157;; this is a practical added value.</p><p>This A Hellas 500 is therefore an attractive choice for anyone looking for a compact motorboat for relaxed trips and sporty boating fun on inland waters. She is being auctioned via Boatauction, so take the time to review the lot information and determine your bidding strategy for this complete set with outboard engine and trailer.</p></p>
