## Various

<p>Console boat 320 now in the online auction. everyone can bid until 22 June 2026.

<h2>Console Boat 320 ready for boating fun</h2><p>This Console Boat 320 is a compact and accessible polyester console boat, designed for relaxed days on the water. She has been used on inland waterways, canals and ditches, as well as on lakes and rivers. This makes her a great choice for anyone looking for a nimble boat for leisure cruising, a day out on the water, or a spontaneous weekend away. Through Boatauction she is offered as a complete set, including a road trailer, so you can easily transport her and launch at different locations.</p><p>With a beam of 1.80 metres and a shallow draft of approximately 0.20 metres, the boat feels at home in shallower areas and narrow passages. That is exactly where a console boat comes into its own: clear, practical, and with the steering position outside, so while underway you stay close to the water and your company. The Console Boat 320 is therefore interesting for buyers searching for terms such as buy console boat, polyester console boat, small motorboat with trailer, and boat for inland waters.</p><h3>What makes this Console Boat 320 so suitable for day trips?</h3><p>She has a straightforward layout and is aimed at comfortable use without complicated systems. The outside steering via the console provides a pleasant seating position and good all-round visibility, which is especially convenient on busy lakes or in narrow canals. In addition, she is supplied with a seat and a swim ladder, making a break alongside or a refreshing dip just that bit easier. Thanks to her compact size, the boat is also quick to handle when docking and mooring, even if you do not yet have years of boating experience.</p><h3>Which engine is fitted and what can you expect from it?</h3><p>The boat is equipped with one Yamaha outboard engine, model F9.9BE, with an output of 10 hp. This four-stroke outboard has electric start, making getting underway and manoeuvring easy and accessible. According to the information provided, the engine is operational and fitted with a lock. A Yamaha 9.9 hp outboard is a popular configuration for this type of console boat: sufficient for relaxed trips and gentle planing where conditions allow, while still being easy to control at low speed in harbours and canals.</p><h3>Is a trailer included, and how practical is that?</h3><p>Yes, she is offered with a road trailer without registration. The trailer has a single axle and is stated to be in good condition. A motorboat with trailer offers above all freedom: you are not tied to one berth and can easily switch between cruising areas. It is also practical for winter storage or maintenance, as you can pick up and store the boat yourself. For buyers looking for a console boat with trailer or a trailerable motorboat, this is an attractive combination, as you get a complete set in one go.</p><h3>What about maintenance and the condition of the hull?</h3><p>The boat is built from polyester and it is stated that she has no osmosis or signs of osmosis. She was last taken out of the water for maintenance in 2026. This provides a useful reference point for interested parties who value insight into the boat's use and care. Polyester is also a popular material for console boats because of its combination of dimensional stability and relatively easy cleaning, which suits recreational use on inland waters.</p><h3>Layout and equipment on board</h3><p>The Console Boat 320 is offered as a complete set with console controls, a seat and a swim ladder. This equipment matches her intended use well: an afternoon cruise, mooring at a jetty or small beach, and stepping back on board with ease. With the outside steering position, the deck remains uncluttered and you keep space for items such as bags, picnic supplies or water toys.</p><p>Looking for a compact console boat with a Yamaha outboard, electric start and trailer, ready to explore different cruising areas straight away? Then this Console Boat 320 is an inviting candidate within the Boatauction auction. She combines practical dimensions with a complete basic specification, so you can focus on boating and enjoying the water.</p></p>
