## Various

Luxury Alu tender 65 now in the online auction. everyone can bid until 24 August 2026.

**Stylish Luxury Alu Tender 65**  
This 2024 Luxury Alu Tender 65 is a modern aluminium tender made for relaxed days on the water. Built by AVR Watersport, she is designed for comfortable yet sporty cruising on inland waterways, lakes and rivers. With an overall length of 6.50 metres and a beam of 2.00 metres, she offers a pleasant balance between onboard space and manoeuvrability. Thanks to the V-bottom, the tender cuts smoothly through the water and feels at home both during calm cruising and at a brisk pace towards a sunny anchorage.

She was first used as a demo boat, after which she was sold and used for one more season for leisure boating. This makes her an interesting option for anyone looking for a young tender with a fresh look and a contemporary layout. The boat is delivered as shown in the auction, which is ideal for buyers who want to know exactly what they are getting.

**Luxury Alu Tender 65 now in the online auction. Everyone can bid up to and including 24 August 2026.**  
**What makes this tender suitable for day trips?**  
For day trips, comfort, easy boarding and a logical layout are key the moment you step aboard. This Luxury Alu Tender 65 has exterior cushions that make the seating area inviting for longer cruises and cosy moments at the dock. The swim platform with swim ladder makes a dip or a swim stop along the way easy, while the self-draining cockpit adds practicality in changing conditions. With an air draft of approximately 0.80 metres, she is also suitable for many routes where bridges and low clearances come into play.

**How does she perform with the Honda BF60 outboard engine?**  
Mounted on the transom is a 2024 Honda BF60 outboard engine with 60 hp, electric start, and reportedly around 50 running hours. This power suits the character of a 6.5-metre aluminium tender well: lively enough for sporty boating, yet easy to modulate for relaxed cruising. On board you will find, among other things, a tachometer and temperature gauge, so you can keep the key engine information in view while underway. The 12V system with alternator supports the basic onboard electrics, and a log speedometer helps fine-tune speed and handling to the water conditions and your company.

**What is the condition of the boat and are there any points of attention?**  
According to the seller, the boat is in good condition and was last taken out of the water for maintenance in 2026. There are scratches on the wrap on the hull. This is mainly a cosmetic point to consider if you value a clean appearance, for example for representative use or if you want to have her finished entirely to your own taste. At the same time, a wrap can be attractive for buyers who already plan to personalise the look. No other known defects have been reported and the engine is operational.

**Is this a smart choice if you are looking for an aluminium tender?**  
Anyone searching for terms such as 'aluminium tender 6.5 metres', 'Luxury Alu Tender 65 for sale' or 'tender with Honda 60 hp' will quickly end up with this type of combination: light, modern and practical. Aluminium is popular for its robust base and contemporary appearance, while the dimensions of 6.50 by 2.00 metres are often just right for a spacious day boat without becoming awkward in the marina. With a weight of approximately 600 kg, she remains manageable in use, although no trailer is included in this auction.

This makes the Luxury Alu Tender 65 an attractive tender for those who enjoy comfortable boating, regularly swim from the platform, and are looking for a young boat with a sporty edge. Her new price was around €60,000, and through BoatAuction she now gets the chance to create many more great days on the water with a new owner.
