Glastron SX175 now in the online auction. everyone can bid until 21 September 2026.

Glastron SX175 ready for summer boating plans

Anyone looking for a sporty bowrider that can be on the water in no time will find this Glastron SX175 an appealing mix of size, power and ease of use. The boat was built in 2004 and measures 5.21 metres in length and 2.24 metres in beam, making her spacious enough for a fun day out with family or friends, yet still easy to handle when trailering and docking. Thanks to her GRP hull and a draft of around 0.85 metres, she is suitable for a wide range of cruising areas. This Glastron is being auctioned via BoatAuction and comes with a package of extras that immediately invites watersports and holiday use.

The SX175 has been used over the years exactly as you€™d hope for this type of sports boat: about two weeks each summer, for boating in Croatia. So she has experience on seas and coastal waters, which often means equipment and onboard safety have been handled with care. Documentation is available in the form of the owner€™s manual and repair invoices, which is reassuring for anyone who likes insight into what has been done in the past.

Glastron SX175 now in the online auction. Everyone can bid up to and including 21 September 2026.

What kind of boat is the Glastron SX175?

The Glastron SX175 is a bowrider sports boat designed for relaxed trips, swimming at anchor and active boating. She is well suited to day trips, but also to holidays where you take her on a trailer to a beautiful cruising area. With her swim platform and swim ladder, getting in and out of the water is easy, and the bimini provides shade on warm days. The exterior cushions make time onboard comfortable, while fenders and lines keep mooring practical.

How does she run with the Volvo Penta 3.0 135 hp?

She is equipped with a Volvo Penta 3.0-litre inboard petrol engine producing 135 hp, with electric start and four cylinders. With approximately 470 engine hours, there is a clear indication of use, and the engine is stated to be operational. This type of power suits a Glastron SX175 well: lively enough for waterskiing and playful acceleration, yet also suitable for relaxed cruising. On board you€™ll find the key gauges such as a fuel gauge, oil pressure gauge, temperature gauge and tachometer, so you can keep a good overview while underway. The fuel tank capacity is 87 litres, which typically provides a nice range for day trips and watersports, depending on driving style and conditions.

Are there any known points of attention or defects?

One specific point is mentioned that you€™ll want to know as a buyer: the engine trims as it should, but the trim gauge that indicates the position is defective. As a result, the trim position can no longer be read on the gauge, while the trim function itself does work. The boat was last taken out of the water for maintenance in 2024, which is relevant for anyone who appreciates a recent moment of inspection and care.

What€™s included and is trailering possible right away?

This auction includes a road trailer with Dutch registration: a Freewheel trailer (registration 64-WB-TR) with a payload capacity of 1,300 kg. It is braked, has a single axle and is fitted with ten rollers and a trailer winch. The intention is clear: this Glastron SX175 is meant to be easy to take along, for example to a holiday destination or another cruising area. The trailer is stated to be in good condition, making the overall package for a sports boat with trailer even more attractive.

Watersports gear and accessories have also been considered. Included are, among other things, waterskis with a tow bridle, a towable tube with rope, a waterproof barrel, paddles, life jackets, anchors, towing mirrors for the car, a flagpole with light and flag, levellers and blue buoys. These extras make it easier to get her ready to go quickly after purchase for recreation, swimming and watersports.

What equipment is on board for comfort and safety?

She has an electric bilge pump, which is a solid safety basic on board. In addition, there are two anchors with line attachments, useful for a swim stop or lunch break on the water. For atmosphere and relaxation there is a radio on board. With the cover you can

protect her when not in use, and the combination of swim platform and swim ladder makes her ideal for summer days on the water.

All in all, this Glastron SX175 is a complete sports boat for anyone looking for a Glastron bowrider, a sports boat with Volvo Penta power, or a trailerable speedboat for holidays and watersports. She invites you to make plans: an afternoon cruise, a weekend away, or taking her to a sunny destination. Through BoatAuction she now gets the chance to build new memories with a new owner.
