MFG Piper now in the online auction. everyone can bid until 21 September 2026.

mfg piper with trailer for versatile boating enjoyment

what type of boat is this mfg piper?

this mfg piper is a compact motorboat measuring 5.00 metres in length and 2.50 metres in width. thanks to its practical dimensions, it offers a pleasant combination of space, manoeuvrability and ease of use. the boat is made of polyester and has a draft of approximately 40 centimetres, making it ideally suited to boating on inland waterways, lakes and rivers.

the piper has a distinctive character and shows that an older boat can still provide plenty of enjoyment on the water. its layout is suitable for relaxing day trips, recreational boating and enjoyable moments with family or friends. anyone looking for an affordable motorboat with a trailer, an inboard engine and sporty performance will find this mfg piper an interesting boat.

mfg piper now in the online auction. everyone can place a bid until 21 september 2026.

how does the mfg piper perform on the water?

while underway, this motorboat is pleasant and quick to handle. it is equipped with a working mercruiser inboard engine producing 120 hp. the four-cylinder engine runs on petrol and is electrically started. with a cruising speed of approximately 50 kilometres per hour and a maximum speed of around 55 kilometres per hour, the boat offers sufficient speed for active trips and relaxed journeys across larger lakes and rivers.

the indoor steering position allows the skipper to maintain a clear view of the waterways from a sheltered position. on board are a fuel tank gauge, temperature gauge and rev counter. these allow the user to monitor important engine information while underway. the fuel tank has a capacity of approximately 70 litres, providing room for enjoyable day trips without having to constantly look for a refuelling point.

is this boat suitable for day trips?

yes, this piper is ideally suited to days of boating enjoyment and recreational trips. its generous width of 2.50 metres contributes to a stable feeling on board. the boat provides an excellent basis for leisurely cruising, swimming, enjoying a picnic on the water or taking a trip along nature reserves and villages situated on the waterfront.

thanks to its limited draft, it can navigate many inland waterways with ease. this makes it appealing to watersports enthusiasts who want to explore different boating areas. whether it is an afternoon on a lake, a trip along a river or a round trip through a water-rich recreational area, the mfg piper can be used for a wide range of plans.

what condition is the boat in?

the boat is in reasonable condition and has an appearance that is consistent with its age. it has been used for recreational boating on inland waterways, lakes and rivers. the owner states that the boat performs well and is pleasant to operate. in 2026, it was also taken out of the water for maintenance. no signs of osmosis have been reported.

as with any used boat, it is advisable to inspect it carefully during a viewing. prospective buyers can pay attention to the condition of the polyester, the interior, the upholstery, the engine compartment and the technical installations. a personal inspection provides the best impression of the boat's condition and any work that a new owner may wish to carry out according to their own preferences.

which engine and equipment are included?

the mfg piper is supplied with its 120 hp mercruiser inboard engine. the engine is operational and has four cylinders. the electric start makes it easy to use, while the available gauges help monitor the engine speed, engine temperature and fuel level. there is one battery on board with a capacity of 100 ah and a voltage of 12 volts.

the combination of a polyester hull, inboard propulsion and indoor steering makes this boat appealing to watersports enthusiasts looking for a practical motorboat with sporty engine performance. the controls are clearly arranged and the equipment is suited to recreational use on inland waterways.

is the mfg piper supplied with a trailer?

yes, a road trailer is included with the boat. this allows the new owner to transport it relatively easily to another boating area or store it on their own property outside the

boating season. the trailer is in reasonable condition and is a practical addition to the boat.

the presence of the trailer provides additional freedom. you are not tied to one permanent mooring and can decide for yourself where you want to go boating. this makes the combination appealing to watersports enthusiasts who enjoy visiting different lakes, waterways and rivers. before transporting the boat, it is advisable to check that the combination is suitable for the towing vehicle and the intended boating location.

who would be interested in this motorboat?

this mfg piper is suitable for watersports enthusiasts looking for an affordable used motorboat for day trips and relaxed recreational boating. its 120 hp engine gives it a lively character, while its compact dimensions make manoeuvring and transport manageable. the included trailer also makes it immediately more versatile.

it could be an excellent choice for a first-time boat owner, but also for someone looking for a second boat for spontaneous trips. the combination of a polyester hull, indoor steering, working inboard engine and trailer gives this piper an attractive foundation. anyone who views it in person and appreciates its possibilities can enjoy many days on the water with this boat.
