Maxima 600 Tender now in the online auction. everyone can bid until 19 October 2026.

maxima 600 tender electric boating

what makes this maxima 600 tender special?

this maxima 600 tender from 2019 combines comfort, space and silent propulsion in an attractive launch for relaxed day trips. her polyester hull is 6 metres long, 2.25 metres wide and has a draft of just 40 centimetres. this makes her feel stable on the water while also making her suitable for a wide variety of cruising areas. the air draft is approximately 1.02 metres and the weight is around 680 kilograms.

the boat was designed for recreational boating on inland waters, canals, ditches, lakes, ponds and rivers. thanks to her electric propulsion, she cruises virtually silently and without exhaust fumes. this makes the maxima particularly interesting for boating areas where peace, nature and emission-free cruising are central. her quiet character also comes into its own in urban areas such as amsterdam.

maxima 600 tender now in the online auction. everyone can place a bid until 19 October 2026.

how does she perform electrically?

the maxima 600 tender is powered by a single torqeedo 3.0 electric motor. this inboard motor starts electrically and is powered by a torqeedo power 24-3500 battery pack. the motor and battery date from 2023 and together form a modern electric drivetrain with a value of €130,850 stated by the consignor. the system is suitable for anyone who wants to cruise comfortably and quietly without the smell and noise of a traditional fuel engine.

the boat comes with a charging cable and a battery charger is present. shore power is also included, allowing her to be conveniently charged at the jetty. the electric propulsion is an excellent match for peaceful trips through nature reserves, historic canals and recreational lakes. the exact range depends on speed, load, wind, current and cruising conditions. the operation of the propulsion system can be examined in more detail during a viewing.

is this launch comfortable for day trips?

yes, this maxima has been designed with relaxed time on board in mind. she features a luxury cushion set, a sun deck and a bow cushion, offering several ways to sit comfortably or stretch out and enjoy the trip. the removable cockpit table makes it easy to have lunch, drink coffee or enjoy a convivial drink on board. when the table is removed, additional space is created in the cockpit.

the teak-look finish gives her an appealing atmosphere and complements the character of a modern tender. the bimini or convertible canopy provides shelter when the weather changes, while the open cockpit creates a spacious and inviting feel on sunny days. thanks to her wide hull, the boat comfortably accommodates family or friends during a trip across the lake or through the canals.

what equipment is included?

the equipment is extensive and focused on comfortable and practical boating. on board you will find navigation lights, a rubbing strake, fenders, lines, an anchor, a 12-volt connection and an electric bilge pump. the self-draining cockpit helps discharge rainwater and any spray. a swimming platform and swimming ladder have been fitted for safe boarding and disembarking.

toilet preparation is also present. this provides options for further installation, depending on the wishes of the future owner. the charging cable for the torqeedo system is included with the boat. thanks to the combination of fenders, lines and practical deck equipment, she can be prepared for new boating trips straight away.

what is her technical and cosmetic condition?

according to the information provided, the maxima is in neat and usable condition. she was last taken out of the water for maintenance in 2026, and the antifouling was also treated that year. No osmosis or signs of osmosis have been reported. The electric bilge pump, self-draining cockpit and available deck equipment contribute to practical use and easy maintenance.

as with any used boat, it is advisable to personally inspect the hull, deck, cushions, canopy, electrical installation and propulsion system during the viewing day. a sea trial or demonstration of the torqeedo motor can also help provide a clear

impression of its operation. the final assessment remains the responsibility of the buyer.

which cruising areas is she suitable for?

this maxima 600 tender is well suited to inland waters, canals, ditches, lakes, ponds and rivers. her shallow draft makes it possible to explore shallower routes, while the electric propulsion is ideal for areas where peace and clean air are important. examples include quiet nature reserves, trips through de weerribben or a relaxed tour through a historic city centre.

according to the information provided, the version with the torqeedo 3.0 is intended to be operated without a boating licence. always check the current regulations applying to the chosen cruising area before departure and adjust the load to the number of passengers. with her stable handling, spacious cockpit and complete recreational equipment, she is suitable for both short outings and longer days on the water.

why bid on this maxima tender?

anyone looking for an electric launch with modern propulsion, comfortable accommodation and broad usability will find this maxima 600 tender an attractive candidate. her combination of a 2023 torqeedo motor, a power 24-3500 battery pack, a luxury cushion set, a convertible canopy, a sun deck and a swimming platform makes her ready for relaxed recreation.

through boatauction, you have the opportunity to bid on this characterful tender. she combines the charm of a traditional launch with the benefits of electric boating. whether you want to explore peaceful natural waterways, visit emission-free zones or cruise through the city with friends, this maxima provides an atmospheric and practical base. the boat is inviting, quiet and versatile, and is waiting for a new owner to enjoy many more beautiful hours on the water.
