## Various

Motorcruiser 900 now in the online auction. everyone can bid until 19 October 2026.

motor cruiser 900 for relaxing days

what kind of boat is the motor cruiser 900?

the motor cruiser 900 is a steel motor cruiser measuring approximately 9 metres in length, around 2 metres in beam and with a draft of approximately 1 metre. she was designed for relaxing trips on inland waterways and lakes. according to the available information, the boat was used for day trips and offers a practical basis for anyone who enjoys being on the water in comfort.

with her manageable dimensions, the motor cruiser 900 is suitable for various cruising areas. the length provides a fixed sleeping berth for two people, while the layout also includes one additional berth. this means she can be used not only for daytime trips, but also for a simple overnight stay on board.

motor cruiser 900 now in the online auction. everyone can place a bid until 19 October 2026.

what is the layout like on board?

inside, the motor cruiser 900 has a steering position with a steering wheel. from the inside helm, you have a view of the surroundings and can operate her from the sheltered cabin. the boat has two fixed berths and one additional berth. the available information does not provide extensive details about the interior, galley facilities or storage space. it is therefore advisable to assess for yourself during the viewing day whether the space suits your intended use.

there is a manual toilet on board. according to the available information, the toilet discharge runs directly into the open water. this is an important point to consider when using the boat. during the viewing day, check the condition, operation and accessibility of the toilet and observe the applicable regulations for the cruising area.

which engine does she have?

the motor cruiser 900 is powered by a Volvo Penta MD17C diesel engine. it is an inboard engine with electric start. according to the information provided by the client, the engine is operational. during the viewing day, you can inspect the engine room, the installation and the general condition of the engine components.

when was she last maintained?

according to the information provided, the boat was last taken out of the water for maintenance in 2024. antifouling was also applied in the same year. this gives you a concrete starting point when assessing the underside and the condition of the underwater hull. during the viewing day, you can review the available maintenance information and assess the visible parts of the hull.

the hull is made of steel. during your inspection, pay attention to the general condition of the paintwork, the through-hull fittings, the deck hardware and areas that are less easily accessible. the stated condition of the boat is good, but every buyer would be wise to inspect her carefully and ask questions about work carried out in the past.

who is this boat suitable for?

this motor cruiser 900 may suit you if you are looking for a compact steel cruiser for peaceful days on inland waterways and lakes. she offers sleeping space for two people and an additional berth when required. the inside helm, diesel engine and practical dimensions make her interesting for anyone looking for a traditional motor cruiser without a trailer.

if you want to buy a boat for short trips, this motor cruiser 900 could be a useful starting point. anyone looking to buy a second-hand boat would be wise to consider not only the price and appearance, but also the engine, hull, technical systems and layout. this boat calls for a personal assessment during the viewing day, so that you can determine whether her dimensions and facilities match your plans.

what should you look out for during the viewing day?

during the viewing day, you can calmly inspect the motor cruiser 900 inside and out. take your time to examine the steel hull, deck, windows, steering position, berths, toilet and engine room. check whether the available facilities match your intended use. the overall finish and available storage space also deserve attention.

good boat-buying tips include writing down your main requirements in advance, comparing the technical specifications and asking specific questions about maintenance and use. as there is only one

viewing day, your own inspection forms an important part of the preparation. the information about the Volvo Penta engine, the maintenance carried out in 2024 and the boat's use on inland waterways and lakes provides an initial impression, but ultimately you must decide whether this boat suits you.

the motor cruiser 900 is being auctioned through BoatAuction. she is a used steel motor cruiser with practical dimensions, sleeping space for up to three people and an inboard Volvo Penta diesel engine. visit the viewing day to assess her condition and layout for yourself before considering placing a bid.
