Sloop 720 now in the online auction. everyone can bid until 19 October 2026.

720 launch with trailer</h2><h3>what kind of boat is the 720 launch?</h3><p>The 720 launch is a compact open boat intended for relaxing day trips on inland waterways. She is approximately 7.20 metres long, 2 metres wide and has a draught of approximately 85 centimetres. The air draft is around 1.50 metres. Thanks to her manageable dimensions, she is an interesting option for anyone looking for a boat for recreational use on lakes, canals and other sheltered waters.</p><p>According to the information provided, the boat has been used for day trips on the water. The client describes her as suitable for a maximum of eight people. This number is a guideline based on the information supplied. How many people you can comfortably take on board in practice depends on the load, the weather conditions and how much space you want to retain on board. Her handling characteristics are described as comfortable on the water.</p><p>720 launch now in the online auction. Everyone can place a bid until 19 October 2026.</p><h3>what engine does the boat have?</h3><p>The 720 launch is powered by a single Mercury outboard engine with an output of 2 hp. According to the information provided, the engine is operational and is started manually. It uses petrol as fuel. The steering position is outside and the boat has one rudder.</p><p>A 2 hp engine is suitable for calm use on inland waterways and relaxed cruises. The ultimate speed and handling are influenced by the number of people on board, the load, the wind and the current. As a buyer, it is advisable to inspect the engine, controls and general condition of the installation carefully during the viewing day.</p><h3>what comes with the boat?</h3><p>A road trailer is included with this boat. The trailer has one axle, four rollers and a trailer winch. It is braked and non-tilting. According to the information provided, the trailer is in good condition and suitable for transporting the boat over short distances and launching and retrieving her from the water. The stated weight is approximately 450 kilograms.</p><p>In addition to the trailer, various accessories are included in the offered equipment. The boat has a cockpit canopy, exterior cushions, boat covers, fenders and lines. There is also one anchor, secured with a line. Life jackets are further listed as part of the safety equipment. A dinghy, toilet and bilge pump are not present or are not applicable according to the information supplied.</p><h3>how is the boat equipped?</h3><p>The 720 launch is an open boat with external steering. The available information contains no further technical details about the exact hull shape or specific construction material. The material has been registered as â#128;#156;other materialâ#128;#157;. It is therefore important that you pay close attention to the hull, deck, cockpit, fittings and upholstery during the viewing day.</p><p>The boat was last taken out of the water for maintenance in 2026. Her general condition is stated as good. Photographs are available as documentation. You should therefore inspect her carefully during the viewing day and check whether the layout and equipment meet your expectations.</p><h3>who is this boat suitable for?</h3><p>This boat is suitable for you if you are looking for an open launch for peaceful trips with family or friends. Her length provides room for a group, while the trailer makes it possible to transport her by road to a suitable inland waterway. The combination of an outboard engine, cockpit canopy and exterior cushions makes her suitable for changing conditions during a day on the water.</p><p>Anyone looking to buy a boat for longer voyages, overnight stays or use on large and often rough waters should take the limited facilities and modest engine power into account. The 720 launch has no toilet and is designed for day recreation. This makes her straightforward, but it also means that you should carefully determine in advance what you want to use her for.</p><h3>what should you look out for if you want to buy this boat?</h3><p>If you are considering buying this boat, it is advisable to inspect the condition of the hull, engine, trailer and accessories in advance. Check whether the canopy and boat covers suit your intended use, inspect the upholstery and pay attention to

the operation of the various components. With the trailer, the rollers, winch, lighting, tyres and coupling deserve extra attention.

For anyone searching for a second-hand boat, it is important not to focus solely on the year of construction and appearance. Transport, storage, maintenance and the available equipment also play a role. This 720 launch is offered with a trailer, which may make her interesting for someone who wants to use her on different inland waterways. The buyer must assess whether the combination of boat, engine and trailer is suitable for their own vehicle and intended use.

what are some useful boat-buying tips?

One of the most important boat-buying tips is to inspect the entire boat during the viewing day. Take time to examine the hull, floor, cockpit, steering, engine and trailer. Also check that the included accessories are present and that their condition matches your expectations. Ask yourself how many people you usually want to take on board and on which waterways you want to sail her.

Also pay attention to practical matters such as storage, transport and fuel. The 720 launch has compact dimensions, but with the trailer and required equipment you still need to have sufficient space for transport and storage. According to the information provided, the available documentation consists of photographs. Use the viewing day to assess the boat carefully before placing a bid through BoatAuction.
