Glastron GT160 now in the online auction. everyone can bid until 14 December 2026.
<h2>Glastron GT160 with Mercury outboard motor</h2><h3>What kind of boat is the Glastron GT160?</h3> The Glastron GT160 is a compact sports boat from 2013, measuring 5 metres in length, 2.11 metres in beam and with a draught of 37 centimetres. She is built from composite material and has a stepped-V hull, a hull shape that contributes to rapid acceleration and sporty handling. The closed bow provides shelter and makes the interior suitable for relaxing trips with family or friends. The boat has wheel steering and, according to the information provided, offers five fixed berths and one additional berth. This means she is suitable not only for a day on the water, but also for a short overnight stay on board. The layout is focused on practical use and recreation. The Glastron was mainly used on inland waterways for day trips and leisure boating. The stated condition of the boat is new. No known defects have been reported. According to the available information, the hull, interior and upholstery are well maintained. The most recent service during which the boat was taken out of the water took place in 2026. The antifouling treatment was also carried out in 2026. <h3>Jeanneau Fantasia 27 now in the online auction. Everyone can place bids until 16 November 2026.</h3><h3>Which engine powers the Glastron?</h3> The Glastron GT160 is powered by a 2019 Mercury 60 hp CT outboard motor. The engine has four cylinders, electric start and runs on petrol. It has reportedly clocked 157 operating hours. The engine is in working order and forms a suitable combination with this compact sports boat. The CT version provides additional thrust at low speeds and while manoeuvring. According to the information provided, the boat gets onto the plane quickly and is manoeuvrable on the water. The stated cruising speed is approximately 35 kilometres per hour. The maximum speed is around 50 kilometres per hour. The actual speed depends on the load, water conditions and weather. The onboard SmartConnect system allows engine data to be read on a phone. This includes operating hours, maintenance information and current engine data. The boat is equipped with a fuel gauge, oil pressure gauge, temperature gauge and tachometer. The electrical system operates at 12 volts and there is one battery on board. <h3>What navigation and equipment are included?</h3> For navigation and depth measurement, the boat is equipped with a Garmin Striker 4. This system includes GPS, a depth sounder and a fishfinder. A compass and a log with speedometer are also present. This equipment is practical for following a route and obtaining information about the water depth. An electric bilge pump is also included in the equipment. Ropes and fenders are supplied as well. There is no dinghy. The equipment is suited to use on inland waterways and for recreational day trips. <h3>Is a trailer included?</h3> Yes, a 2021 Sun Way road trailer is included in the sale. It has a load capacity of 1,350 kilograms, one axle and a braked configuration. The trailer is equipped with a trailer winch, fold-away LED lighting and a spare wheel. The trailer is described as being in good condition. It is intended for transporting the Glastron by road and makes it easier to reach different boating areas. When assessing the combination, it is advisable to take into account the total weight of the boat, engine, equipment and fuel, as well as the towing capacity of your car. <h3>What is known about the boatâ€™s history?</h3> According to the information provided, the boat was purchased from Powerboatcenter. She was mainly used for relaxing on the water and primarily sailed on Belgian inland waterways. It has been indicated that the boat has always received attention and maintenance. The original papers and maintenance records are present. The combination of the Glastron GT160, the Mercury engine and the Sun Way trailer makes her suitable for anyone looking for a sporty boat for recreational use. She offers a relatively compact size, shallow draught and sufficient space for day trips with several people. Thanks to the berths, she can also be used for a short stay on board. <h3>What should you look out for when buying a boat?</h3> Anyone

© yachtadvert.com 2026

looking to buy a boat would do well to consider more than just its appearance. It is also important to look at the engine hours, technical equipment, trailer and available documentation. For this Glastron, 157 operating hours have been reported for the Mercury engine, and the original papers and records are available. During the viewing day, check whether the finish, upholstery, equipment, engine and trailer meet your expectations. This boat may also be of interest to someone looking to buy a used boat with a relatively recent engine and a trailer from 2021. Keep in mind that the hull dates from 2013, while the engine and trailer were built in later years. This difference in age is relevant when assessing the combination. <h3>Which boat-buying tips are important?</h3> One of the most important boat-buying tips is to decide in advance what you want to use the boat for. For calm inland waterways, short day trips and recreational use, the Glastron has a suitable layout. If you mainly want to spend the night on board with several people, it is advisable to carefully assess the available space and berths during the viewing day. Also look at the condition of the upholstery, the operation of the instruments and the general condition of the trailer. In addition, check whether the dimensions and weight are suitable for your storage location, slipway and tow vehicle. The boat is being sold through BoatAuction. There is only one viewing day, during which you can inspect her up close and verify the available information.
