Various

Cranchi Giada 30 now in the online auction. everyone can bid until 16 November 2026.
<h2>Cranchi Giada 30 for holidays</h2><h3>What type of boat is the Cranchi Giada 30?</h3> The 1999 Cranchi Giada 30 is a polyester motorboat with a V-shaped hull, a length of 9.50 metres and a beam of 3.19 metres. She was designed for day trips, longer excursions and holidays on the water. The boat was used at sea and, thanks to her dimensions, offers a combination of outdoor space and accommodation for staying on board. With a draught of 0.90 metres and an air draft of 2.55 metres, she is suitable for various cruising areas, while of course taking local bridges, shallow waters and conditions on the water into account. The steering position is located outside and is operated with a steering wheel. An electric bow thruster assists with manoeuvring in harbours and when mooring. <h3>How much space does she offer on board?</h3> Inside, the Cranchi Giada 30 has an interior headroom of approximately 1.85 metres. She has two fixed berths and two additional berths when the saloon is converted. The layout includes a saloon with dining area, a separate toilet compartment and a shower. Mattresses, a refrigerator and hot water are also available. The water tank has a capacity of 120 litres. The holding tank also has a capacity of 120 litres. The toilet is manually operated and, according to the information provided, the discharge does not flow directly into open water. There is no heating, so use is primarily aimed at the warmer months or cruising areas with a mild climate. Outside, she offers a spacious cockpit with a convertible seating area. A sun deck is located on the bow. The swimming platform is equipped with a bathing ladder and SeaDek covering. A bimini provides shade from the sun, while exterior cushions make staying in the cockpit more comfortable. Cockpit and cover canvas are also included. <h3>Which engines does this boat have?</h3> The boat is equipped with two 1999 Volvo Penta 4.3 Gi Duoprop engines. Both engines are inboard petrol engines with electric starting systems and a stated output of 225 hp each. According to the available information, both engines are operational. The engines are fitted with new fuel pumps, and the outdrive on the starboard side has been replaced. The stated cruising speed is approximately 50 kilometres per hour. According to the information provided, the maximum speed is around 65 kilometres per hour. The actual performance depends on the load, cruising area, weather conditions and the technical condition of the engines and drives. The boat has gauges for fuel level, oil pressure, temperature and engine speed. The most recent maintenance, during which the boat was taken out of the water, took place in 2026. The antifouling treatment was also carried out in 2026. According to the seller, the maintenance history is available. During the viewing day, you can inspect the available documentation and technical components in more detail. <h3>What navigation equipment and facilities are available?</h3> For navigation and monitoring, she has a GPS, chartplotter, compass, depth sounder, fishfinder, log and speedometer, VHF radio and radar. The installation is supplemented by a Bluetooth audio system with CarPlay. The electrical system operates on 12 volts and 220 volts. There are two batteries on board, as well as a battery charger and shore-power connection. One anchor with chain is provided for anchoring. The electric windlass makes lowering and raising the anchor easier. A lifebuoy is on board for safety. An electric bilge pump is also part of the equipment. A dinghy and trailer are not included. <h3>Who is this Cranchi suitable for?</h3> This Cranchi Giada 30 is suitable for you if you are looking for a motorboat for day trips, sunny weekends and holidays with a small group. She offers sleeping space for two people in the fixed arrangement and, thanks to the convertible saloon, can accommodate two additional sleepers. The combination of two engines, a bow thruster, a swimming platform and compact accommodation makes her versatile. If you are looking to buy a boat for recreational use at sea, this model can be considered a spacious option from 1999. The boat weighs approximately 4,000 kilograms. When assessing

her, take the age of the hull, engines, systems and equipment into account. An inspection of the condition and operation during the viewing day therefore remains important. <h3>What should you look out for when buying?</h3> If you are looking for tips on buying a boat, it is wise not to focus only on length, layout and speed. Also check the maintenance documentation, the operation of both engines, the drives, the electrical systems, the navigation equipment and the tank systems. In addition, carefully inspect the upholstery, hatches, windows, deck, cockpit and swimming platform. When buying a second-hand boat, it is advisable to take the age of all components into account. Some equipment may have been replaced over the years, while other parts may still date from the year of construction. The information provided states that the GPS was recently updated and that a new outdrive was installed on the starboard side. During the viewing day, check the condition of these components and ask for the accompanying documentation. <h3>How can you view this boat?</h3> The Cranchi Giada 30 is being sold through BoatAuction. There is a viewing day during which you can inspect her and assess the condition of the boat, accommodation, engine compartment and equipment on board. During your visit, take the time to check the finish, technical installations and available maintenance information. This boat is being sold because the current owners are switching to another model. If you are considering buying a second-hand boat and value a spacious cockpit, a practical interior layout and twin Volvo Penta propulsion, this Cranchi Giada 30 could be an interesting boat to inspect more closely during the viewing day.
