Garin 1550 now in the online auction. everyone can bid until 16 November 2026.
<h2>Garin 1550 with Spacious Layout</h2> The 2000 Garin 1550 is a spacious polyester motorboat measuring approximately 15.50 metres in length, 4.30 metres in beam and with a draft of 1.20 metres. Her V-shaped hull and dual controls are suited to a vessel that can be operated both indoors and outdoors. The boat has been used at sea and, according to the available information, was used for day trips and relaxing stays on board. With her generous dimensions, this Garin offers plenty of living space. She has two cabins and four permanent berths. The layout is suitable for spending longer days on board and also provides the option of occasional overnight stays. The flybridge offers additional outdoor space, allowing you to make the most of the views and fresh air. <h3>Garin 1550 now in the online auction. Everyone can place a bid until 16 November 2026.</h3><h3>What makes this Garin 1550 interesting?</h3> This Garin 1550 stands out thanks to its combination of space, equipment and practical engine installation. She has two Volvo Penta TAMD74 diesel engines from 2000. Both engines are reported to be operational. The technical specifications state 511 running hours. The additional description mentions 515 hours, so it is advisable to check the available documentation and the current hour-meter readings during the viewing day. The engines are connected to a fuel tank with a capacity of 2,000 litres. Equipment for manoeuvring and staying on board includes a hydraulic anchor winch, an electric bilge pump and an electric toilet. According to the information provided, the toilet discharge does not flow directly into open water. <h3>How is the accommodation laid out?</h3> Inside, the Garin offers a dining area with kitchen facilities. She has a refrigerator, freezer, cooking appliance, oven and microwave. Hot water, mattresses and air conditioning are also listed among the available amenities. The description mentions two sanitary areas with shower facilities. The available equipment makes the boat suitable for relaxing days on board and for overnight stays with a small group. The permanent berths are divided between two cabins. This allows four people to stay overnight on board without having to use the saloon entirely as sleeping accommodation. The finish and layout are appropriate for a motorboat of this size and age. Anyone looking to buy a used boat should take the opportunity during the viewing day to inspect the condition of the interior, the operation of the equipment and the overall condition of the living areas. <h3>What navigation equipment is available?</h3> A comprehensive range of navigation equipment is installed on board. The equipment includes AIS, autopilot, depth sounder, fishfinder, GPS, chartplotter, log and speedometer, VHF radio and radar. This equips the boat for navigation on various waterways and for use in changing conditions. The operation, age and current condition of the individual devices can be assessed during the viewing day. The electrical system operates on 12 volts and 220 volts. On deck, there is a bimini, sprayhood, cockpit tent, outdoor tables and exterior cushions. She also has a swimming platform with swim ladder, pulpit, pushpit, fenders and lines. A tender is not included in the offered equipment. <h3>What is the boatâ€™s outdoor space like?</h3> The Garin has several areas for sitting outdoors. The cockpit can be equipped with a cockpit table and outdoor cushions and can be sheltered with the cockpit tent. The flybridge provides a second outdoor area with all-round views. The swimming platform at the stern makes spending time by the water practical and provides access to the swim ladder. One anchor is provided for anchoring, attached to a chain. It is operated using a hydraulic anchor winch. During the viewing day, you can take a closer look at the condition of the anchor, chain, winch, deck fittings and available covers. <h3>What should you look out for during the viewing day?</h3> The stated condition of the boat is good, but a viewing remains important so that you can assess her condition yourself. Pay attention to the polyester hull, deck, windows, cockpit, flybridge and the operation of the

**available facilities. The engine room, bilge pump, electrical systems, navigation equipment and sanitary installation also deserve attention. The boat was taken out of the water for maintenance in 2026 and received antifouling treatment in the same year. This provides a recent opportunity to inspect the underwater hull, but its current condition is best assessed during the viewing day. If relevant to you, bring someone with technical knowledge or take the available maintenance information time to review carefully. <h3>Who is this motorboat suitable for?</h3> The Garin 1550 is suitable for someone looking for a spacious motorboat for day trips, staying on board and travelling at sea. Her two engines, extensive navigation equipment and comfortable accommodation offer many possibilities. At the same time, a boat of this size requires attention to maintenance, mooring, fuel consumption and the costs associated with its systems and engines. Anyone searching online for buying a boat, buying a used boat or tips for buying a boat should not focus solely on length and equipment. The condition of the hull, engine hours, maintenance history, technical operation and the way the boat has been used are at least as important. This Garin can be viewed during the viewing day, allowing you to assess her layout, equipment and overall condition for yourself. **
