Succeskruiser 900 now in the online auction. everyone can bid until 14 December 2026.
<h2>Succeskruiser 900 for Relaxed Inland-Water Cruising</h2><h3>What kind of boat is the Succeskruiser 900?</h3> The Succeskruiser 900 is a steel motorboat built in 1980, measuring 9 metres in length and 2.85 metres in beam. She has a draft of approximately 90 centimetres and an air draft of around 2.30 metres. This makes the boat suitable for use on many inland waterways, where her limited draft and manageable dimensions are especially useful. The interior headroom is approximately 1.90 metres, providing sufficient room to move around, even for taller people. The boat has been used for day trips, holidays and weekends away. Her layout is designed for comfortable stays on board, with fixed sleeping accommodation for two people and space for two additional berths. The Succeskruiser 900 therefore offers possibilities for couples and small families looking for a boat for recreational use on lakes, canals and rivers. <h3>What is the layout on board?</h3> Inside, she has a practical living area with a dining nook, galley facilities and sleeping accommodation. On board are a cooker, oven, microwave, refrigerator and freezer compartment. Mattresses are also included. Sanitary facilities consist of a manually operated Porta Potti. The toilet waste is not discharged directly into the open water. The boat has a water tank with a capacity of approximately 250 litres. A warm-air heating system is installed for heating. The indoor helm with steering wheel provides good visibility from the saloon while manoeuvring and cruising. Her layout allows you to stay comfortably inside during the day and later convert the space for overnight stays. <h3>What engine and cruising characteristics does she have?</h3> The Succeskruiser 900 is powered by a single Lombardini diesel engine of the TMC60M type. This four-cylinder inboard engine dates from 2004 and delivers 35 hp. The stated number of running hours is approximately 2,700. The engine is electrically started, and the stated fuel consumption is around 2.5 litres per hour. Her cruising speed is approximately 8 kilometres per hour. The stated maximum speed is around 12 kilometres per hour. The boat has a single rudder system and an electric bow thruster. The bow thruster can provide additional control, particularly when leaving a berth or turning in a narrow harbour. The installed tachometer helps you monitor the engine while cruising. The boat was last taken out of the water for maintenance in 2024. The antifouling was also applied that year. According to the available information, the engine is operational. No known defects have been reported, but as with any used boat, it is advisable to carefully assess the general condition and finish yourself during the viewing day. <h3>What equipment is included?</h3> For staying on board, she is equipped with shore power, an inverter and a solar panel. There are four batteries with a stated combined capacity of 480 amp-hours. According to the information provided, the two 180 amp-hour domestic batteries were installed in 2025. The electrical system operates at 12 volts and 220 volts. In terms of navigation equipment, the Succeskruiser 900 is equipped with an AIS system, depth sounder, fishfinder, chartplotter and VHF radio. According to the description, the chartplotter and AIS were installed in 2025. The VHF radio was also fitted in 2025. In 2026, a compressor refrigerator with freezer compartment was added. Outside, there is a cockpit tent, guardrails, swimming platform, swimming ladder, fenders and lines. An electric bilge pump is also installed, and one anchor with line is included. <h3>Who is this boat suitable for?</h3> This Succeskruiser 900 is a good fit if you are looking for a manageable motorboat for relaxed trips and longer stays on inland waterways. She has sufficient facilities for weekends and holidays, without her dimensions becoming impractical in smaller harbours or cruising areas. The combination of a diesel engine, bow thruster, indoor helm and sheltered living space makes her appealing for recreational cruising over several seasons. If you are considering buying a boat, this model offers a steel cruiser with a classic layout and practical equipment. For anyone

looking to buy a second-hand boat, she also provides a clear overview of the available facilities and the age of the various systems. When buying a boat, it is especially important during the viewing day to pay close attention to the condition of the steelwork, engine room, electrical installation, upholstery and the operation of the equipment on board. <h3>What is important during the viewing day?</h3> The boat can be viewed carefully during the viewing day. This is the opportunity to assess the exterior, interior, engine room and installed systems in person. Take the dimensions, sleeping accommodation and equipment into account when making your decision. You can also determine whether the layout suits the type of use you have in mind. The Succeskruiser 900 is being offered through BoatAuction. She combines compact exterior dimensions with a practical interior, a 35 hp diesel engine and an equipment level that has been upgraded in several areas in recent years. According to the seller, the reason for the sale is the purchase of a larger boat. Perhaps this Succeskruiser 900 is exactly the size you are looking for for relaxing weekends, holidays and day trips on inland waterways.
