VAN DER HEIJDEN DYNAMIC 1500 â€“ 2007
A Dutch steel motor yacht, comfortable and particularly well equipped
This VAN DER HEIJDEN DYNAMIC 1500 is a beautifully constructed Dutch motor yacht, made of steel, distinguished by its generous volumes, quality of layout, and excellent autonomy. With its 15.80 meters in length and 4.50 meters in width, it offers true living comfort on board, both for coastal cruising and for river navigation and canals.
Its interior layout prioritizes space and independence with two large double cabins, each benefiting from beautiful volumes, as well as two bathrooms with electric toilets. The convivial saloon and the fully equipped kitchen (electric induction stove replacing the gas stove, mini oven, refrigerator, and 2 freezers) allow for peaceful extended stays on board. A laundry room with a washing machine and storage completes this particularly functional layout. The complete rigid cockpit closure in dibond (a rot-proof material) ensures comfort outdoors in all seasons.
Regarding propulsion, this Dynamic 1500 is equipped with two VETUS DEUTZ DT66 engines of 170 HP each, totaling approximately 1,100 hours and in remarkable condition. The engine compartment is very clean, with air intake provided by a large fan. Regularly maintained, they are coupled with a shaft line transmission and 4-blade propellers. The bow thruster (replaced in 2022) and stern thruster significantly facilitate maneuvers in port.
Its technical equipment is also a real asset: ONAN generator, recent VICTRON electrical installation (2023), inverters, isolation transformers with audible alarm in case of power supply failure from the shore electricity and six solar panels of 360 W each (Total power 2160w) ensure appreciable electrical autonomy, as well as a bank of 6 gel service batteries 12v 165 AH from 2024 - 1 battery for ONAN generator - 2 engine batteries from 2023. The KABOLA central heating of 14 kW allows enjoying the boat in all seasons.
The electronics include notably a GARMIN ECHOMAP 92 SV GPS chartplotter, a STANDARD HORIZON GX1400 GPS VHF, an OCEAN SIGNAL ATB1 Class B AIS transceiver, and an interior and exterior PIONEER audio system.
Particularly well-maintained by its owner, the boat has benefited from several important improvements: interior renovation in 2023, service batteries replaced in 2024, hull bottom painting and antifouling in 2025, then deck painting refurbishment in 2026. The hull is fully insulated (deck and floors) and the bottoms are reported without visible signs of corrosion. The hull is ballasted in the keel ensuring better stability while sailing.
This VAN DER HEIJDEN DYNAMIC 1500 represents a great opportunity for sailing enthusiasts looking for a robust, habitable, and autonomous motor yacht, offering an appreciable level of comfort for long-distance cruising as well as for residential use afloat.
A spacious, well-equipped, and maintained boat, ready to welcome new sailing projects.
Visit by appointment.
